[Press Releases 2009](#)

There were fewer visitors than expected however we collected several good leads and one in particular will result in a sale of our desk top laser marking system namely the TruMark 1000 that we were exhibiting.

Tony Dain, Product Manager Solid State Lasers, Trumpf Ltd

Most of our interesting leads came from the UK which was a surprise, given the location. The event seemed well attended and the venue was excellent.
Mr Ray Wheeler, Managing Director, The Guardline Group

After attending as a visitor Medtec Ireland last year, we decided to exhibit this year to present the Mikron offering to the Irish market. With many opportunities to network with existing customers, we also made new contacts with European and worldwide companies new to Mikron. This was a very informative and cost effective way to meet new decision makers and develop new automation partnerships. We will be back next year.
David Drury, Sales Manager Great Britain & Ireland, Mikron Automation

The intimate nature of the exhibition meant a more personable approach to our enquirers was more conducive to doing business and in fact good qualified interest was shown in our products.

David Murrell, Sales Director, RDM Test Equipment Ltd

The visitors to our stand were of a high standard and were from various backgrounds, The visitors are now aware of Rosti and how we can add value to their supply chain.

Robert Wardrop, Business Development Manager, Rosti
